

May 2026 Clinical Walkthrough

Multi-Site Quality Review | May 2026

Overview

■ Sites Visited

- Princeton – May 6
- Bethesda – May 13
- Bowie – May 14

■ Key Themes & Action Items

Princeton | May 6, 2026

Princeton – Clinic Overview

■ 20 patients • 16 scans • 3 techs

■ Issues & Complaints

- Medications not labeled
- Storage room needs an additional shelf

Princeton – Varithena (Cortney)

■ 20 minutes total

- Measured all artifact
- DVT r/o performed before procedure
- Optisign video played
- Consents signed
- Sharps disposed of properly
- Time-out performed out loud

■ Areas for Improvement

- Scanned SSV but documented as GSV
- Patient felt experience focused on cosmetics, not her concern

Princeton – Varithena (McKinley)

■ 8 minutes total

- Talk ran 12 minutes
- Presenter not fully confident
- "Knock on wood" language used
- 1 hour total appointment
- Consents signed
- Sharps disposed of properly
- Time-out performed out loud

Princeton – RFA (Jen)

■ 23 minutes total (13 min for RFA)

- Scan took 40 minutes – 1 hr total
- Optisign video NOT played
- Initially refused scan-assist; accepted after trial
- Consent signed
- Sharps disposed of properly
- Time-out performed out loud

Bethesda | May 13, 2026

Bethesda – Clinic Overview

■ 26 patients • 18 scans • 3 techs

■ Issues & Complaints

- Front desk rooms all patients
- Techs prep RFAs independently
- Medications not labeled

Bethesda – Varithena + US (Rob)

■ 24 minutes total (8 min for Varithena)

- All consents signed
- Varithena tray set-up was efficient
- Rob was very outgoing with patient
- Sharps disposed of properly
- Time-out NOT performed out loud

Bethesda – US Review

■ 14 minutes total

- Thoroughly explained findings to patient
- Folder given by front desk
- Optisign video played
- Note completed properly
- No iPad available

Bethesda – RFA + US (Dr. Green / Ruth – Training)

■ 40 minutes total (14 min for RFA)

- Consent signed
- Sharps disposed of properly
- Note completed
- Time-out NOT performed out loud
- Wrong note opened initially
- US note not completed properly

Bowie | May 14, 2026

Bowie – Clinic Overview

■ Issues & Complaints

- Front desk rooms all patients
- RFA times are stretched
- Techs prep RFAs independently

Bowie – RFA + US (Case 1)

■ 55 minutes total (15 min for RFA)

- Sharps disposed of properly
- Topical lidocaine used — no access issues
- Time-out NOT performed out loud
- 16g needle used before intro noted
- Physician bent over during ablation
- Sonographer assisting patient — limits availability

Bowie – RFA + US (Case 2)

■ 1.5 hours total (RFA 35 min)

- Sharps disposed of properly
- Time-out NOT performed out loud
- RFA performed before post-scan
- Multiple failed GSV access attempts — switched to SSV
- Physician looked to observer for guidance
- US note not completed properly

Bowie – US Review

■ 10 minutes total

- Thoroughly explained findings to patient
- Folder given by front desk
- Optisign video played
- Note completed
- No iPad available

Key Themes & Action Items

Recurring Issues Across All Sites

■ CRITICAL — Address Immediately

- Medications NOT labeled at all sites
- Time-out NOT performed out loud (multiple sites)

■ OPERATIONAL CONCERNS

- Front desk rooming patients (Bethesda, Bowie)
- Techs prepping RFAs independently (Bethesda, Bowie)
- No iPad for US reviews (Bethesda, Bowie)
- Optisign video not played in some cases

■ POSITIVE OBSERVATIONS

- Sharps disposal consistently compliant
- Most consents signed
- Patient education thorough in US reviews

Action Items

- **Label ALL medications — no exceptions**
- **Reinforce time-out protocol — must be out loud every time**
- Clarify front desk vs. tech rooming responsibilities
- Ensure Optisign video plays for every eligible patient
- Provide iPads at Bethesda and Bowie for US reviews
- Fix RFA documentation — correct note, complete US notes
- Coach McKinley on confidence and talk timing
- Bowie: review RFA sequencing (post-scan should follow RFA)
